TENTHS OF MILE

ROCKABEMA LAKE

Moro Twp., Aroostook County
U.S.G.S. Green Mountain, (7 1/2') and
U.S.G.S. Knowles Corner, Me (7 1/2')

Fishes

Landlocked salmon	Blacknose dace
Brook trout	Creek chub
Rainbow smelt	Fallfish (chub)
Minnnows	White sucker
Golden shiner	Redbreast sunfish
Common shiner	Pumpkinseed sunfish
Redbelly dace	American eel

Physical Characteristics

Area - 339 acres
Average depth - 20 feet
Maximum depth - 40 feet

Temperatures:
Surface - 70°F
36 feet - 48°F

Principal fisheries: Landlocked salmon, brook trout

Rockabema Lake is managed for landlocked salmon and brook trout sport fisheries. During summer months an oxygen deficiency below 20 feet develops and limits coldwater sportfish habitat during this time. However, Rockabema Lake does not have several competing species such as yellow perch and hornpout (bullhead) and thus salmon and trout are capable of supporting satisfactory sport fisheries. Yearling brook trout have been stocked since 1994 to supplement wild brook trout and improve the trout fishing. This continues to be an experimental stocking program and is currently being evaluated.

Conservative regulations have been implemented to maintain and enhance the trout and salmon sport fisheries.

Access to Rockabema Lake is via improved private gravel roads maintained by industrial landowners for forest management purposes. A public boat launch and parking area is available.
